The valuation rate was 3.5% from 2013 to 2020, 3.0% from 2021 to 2024, and 3.5% in 2025 and thereafter. The morbidity used was the pricing assumptions and the mortality was 2001CSO until 2017, with pricing lapse rates and total terminations capped at 8%. Beginning with 2018 issues, the mortality table used is 2017CSO.

Miscellaneous individual/group health products:

- This includes small blocks of disability income, cancer, major medical and other health products
- Methods, interest rates and morbidity/mortality tables being used are appropriate to the business being valued and the valuation standards governing them.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Bankers Life and Casualty Company ("Company") are presented on the basis of accounting practices prescribed or permitted by the Illinois Department of Insurance ("Department").

The Department recognizes only statutory accounting practices prescribed or permitted by the State of Illinois for reporting the financial condition and results of operations of an insurance company and determining its solvency under Illinois Insurance Law. The *Accounting Practices and Procedures* manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Illinois. However, the State of Illinois may adopt certain prescribed accounting practices that differ from those found in NAIC SAP. In addition, the Department has the right to permit other specific practices that deviate from prescribed practices. However, the Company has no such permitted practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Illinois is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts. It also requires disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations with mortality risks are recognized as income when received. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholders' dividends is related to actual interest, mortality, morbidity, and expense experience for the year and judgment as to the appropriate level of statutory surplus to be retained by the Company.

In addition, the Company uses the following accounting policies:

(1) Short-term investments and cash equivalents are stated at amortized cost, which approximates fair value.

(2) Bonds not backed by other loans are stated at amortized cost using the interest method, with the following exceptions: (i) those containing call provisions, except "make-whole" call provisions, are amortized using the yield-to-worst method; and (ii) those rated NAIC class 6, which are stated at the lower of amortized cost or fair value. SVO-identified bond exchange-traded fund investments are reported at fair value with changes in fair value recorded as unrealized gains or losses. The Company does not utilize the systematic value measurement method for SVO-identified investments.

(3) Unaffiliated common stocks are carried at fair value.

(4) Redeemable preferred stocks are stated at amortized cost, except those rated NAIC class 4 or lower quality, which are carried at the lower of amortized cost or fair value. Perpetual preferred stocks are carried at fair value, not exceeding any currently effective call price.

(5) Mortgage loans on real estate are stated at the amortized unpaid balance, excluding accrued interest.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern, continued

(6) Asset-backed securities are stated at amortized cost using the interest method, except for those rated NAIC class 6, which are stated at the lower of amortized cost or fair value. For securities that are of high credit quality at acquisition, changes in currently estimated cash flows, including the effect of prepayment assumptions, are accounted for using the retrospective method. For securities that are not of high credit quality at acquisition, changes in currently estimated cash flow estimates are accounted for using the prospective method.

(7) Properties held for sale are carried at the lower of depreciated cost or fair value. The estimated fair value is based on market quotes.

(8) Affiliated common stocks of insurance affiliates are carried at statutory equity. All affiliated non-insurance entities are valued at the Generally Accepted Accounting Principles (“GAAP”) equity of the investee.

(9) The Company has minor ownership interests in joint ventures, which are classified as other invested assets on the balance sheet. The Company carries these interests based on its proportionate share of the underlying audited GAAP equity of the investee. Residual tranches are classified as other invested assets on the balance sheet and carried at the lower of fair value or cost less distributions received, according to the practical expedient outlined in SSAP No. 21, Other Admitted Assets.

(10) All derivatives are stated at fair value.

(11) The Company does not utilize anticipated net investment income as a factor in the premium deficiency reserve calculation.

(12) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount reported. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

(13) The Company has not modified its capitalization policy from the prior period.

D. Going Concern

The Company's management does not have substantial doubt about its ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

In August 2023, the National Association of Insurance Commissioners (NAIC) adopted revisions to SSAP No. 26, Bonds ("SSAP No. 26"), that introduced principle-based bond concepts on what should be reported as a long-term bond. The Company adopted revisions to SSAP No. 26 on January 1, 2025. Under this new principles-based bond definition, companies are required to develop policies that ensure that instruments are only classified as bonds when they (1) meet the definition of a security, (2) represent a creditor relationship in substance and, (3) for asset backed securities, put the investor in a substantially different position than if they held the underlying assets directly. For financial asset backed securities, substantive credit enhancement must exist in addition to a creditor relationship in substance, and for cash generating non-financial asset backed securities, a meaningful level of cash flows must also exist in order to meet the definition of a bond. The assessment requires management judgment, for example, in determining whether a creditor relationship in substance exists in cases where there are underlying equities, and in determining whether substantive credit enhancement and a meaningful level of cash flows exist for asset-backed securities.

The Company performs its analysis to determine whether a security meets the definition of a bond on a case-by-case basis. To determine whether a creditor relationship exists, the Company considers several factors including, but not limited to, an evaluation of any underlying equity interests, the existence of predetermined principal and interest payments, and the variability of cash flows arising from the security. For asset backed securities, the Company additionally considers the existence and extent of subordination, the existence of collateral or guarantees, the extent of overcollateralization, and the investment’s credit rating in determining whether substantive credit enhancement exists. In addition, for cash generating non-financial asset backed securities, the Company is required to evaluate whether a meaningful level of cash flows exists. The Company uses the practical expedient pursuant to SSAP No. 26 and concludes that a meaningful level of cash flows exists when less than 50% of the original principal relies on sale or refinancing. When the practical expedient is not met, the Company performs additional analysis to determine whether a meaningful level of cash flows exists, considering, among other factors, the price volatility in the principal market for the underlying collateral, the liquidity in the principal market for the underlying collateral, the diversification characteristics of the underlying collateral, the overcollateralization of the underlying collateral relative to the debt obligation, and the variability of cash flows, from sources other than sale or refinancing, expected to be generated from the underlying collateral.

The application of the principles-based bond definition requires significant judgment and therefore results of its application may change for individual securities as conditions change and new information becomes available.

Refer to Note 21 C for further details on the cumulative prospective effect of adopting the principles-based bond definition guidance.

In March 2024, the NAIC adopted revisions to SSAP No. 21, Other Admitted Assets ("SSAP No. 21"). The Company adopted revisions to SSAP No. 21 on January 1, 2025, which resulted in a change in measurement for residual tranches. The Company transitioned to the new guidance, electing the practical expedient in lieu of the Allowable Earned Yield Method for valuing residual tranches, replacing the previous Lower of Amortized Cost or Fair Value Method. This change, applied prospectively, led to the realization of prior unrealized losses.

During 2025 and 2024, the Company did not record any material corrections of errors.

D. Asset-Backed Securities

(1) Prepayment assumptions for asset-backed securities are obtained from third party vendors and internal estimates. These assumptions are reviewed for consistency with the current interest rate and economic environment.

(2) The Company did not record any other-than-temporary impairments (“OTTI”) in 2025 under SSAP No. 43 – Asset-Backed Securities (“SSAP 43”), resulting from either an intent to sell or the inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis.

(3) The Company did not recognize any OTTI in 2025 as a result of an expected shortage of discounted future cash flows to recover the amortized cost of the security on currently held asset-backed securities.

(4) Asset-backed securities owned at December 31, 2025 that have not been impaired with a fair value lower than amortized cost are summarized below by length of time that individual securities have been in a continuous loss position.

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	$ 9,619,336
2. 12 Months or Longer	$ 241,036,446

b. The aggregate related fair value of securities with unrealized losses:

2. 12 Months or Longer	$ 2,287,967,451

NOTES TO FINANCIAL STATEMENTS

5. Investments, continued

(5) The Company regularly evaluates its investments with unrealized losses for possible impairment. The Company's assessment of whether unrealized losses are "other-than-temporary" requires significant judgment. Factors considered include: (i) the extent to which fair value is less than the cost basis; (ii) the length of time that the fair value has been less than cost; (iii) whether the unrealized loss is event driven, credit-driven or a result of changes in market interest rates or risk premium; (iv) the near-term prospects for specific events, developments or circumstances likely to affect the value of the investment; (v) the investment's rating and whether the investment is investment-grade and/or has been downgraded since its purchase; (vi) whether the issuer is current on all payments in accordance with the contractual terms of the investment and is expected to meet all of its obligations under the terms of the investment; (vii) whether or not the Company intends to retain the investment until its anticipated recovery occurs; (viii) whether it is more likely than not that circumstances will require the Company to sell the investment before recovery occurs; (ix) the underlying current and prospective asset and enterprise values of the issuer and the extent to which the recoverability of the carrying value of the Company's investment may be affected by changes in such values; (x) projections of, and unfavorable changes in, cash flows on structured securities including mortgage-backed and asset-backed securities; (xi) the Company's best estimate of the value of any collateral; and (xii) other objective and subjective factors.

Call Options

(1) The credit risk of call options is the risk that the seller of the option will not pay the return earned through the option. The Company limits this risk by primarily purchasing options from counterparties believed to be strong and creditworthy. Since the purchaser is not required to exercise a call option, the market risk is limited to the market value of the option. No funds or collateral are required of the purchaser of a call option other than the initial cost of the option. Our agreements with certain counterparties require them to post collateral, subject to minimum posting thresholds.

(2) The Company issues equity-indexed annuity and equity-indexed universal life products that provide a guaranteed base rate of return and a higher potential return linked to the performance of the S&P 500 Index and Morningstar US Dividend Growth Barclays 5% VC Index. The Company purchases primarily one-year call options in an effort to hedge potential increases to policyholder benefits resulting from increases in the associated indices to which the policy's return is linked. The Company's hedges are categorized as fair value hedges.

(3) The S&P 500 Index and Morningstar US Dividend Growth Barclays 5% VC Index call options meet the criteria of a highly effective hedge and are therefore valued and reported using hedge accounting. Under hedge accounting, the options are recorded at cost and marked to market, with the change in fair value reported as a component of net investment income. At the time the option expires or is terminated, any difference between cash received and the cost basis is recognized as a component of investment income.

NOTES TO FINANCIAL STATEMENTS

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. Defined Benefit Plan

The Company has a noncontributory, unfunded deferred compensation plan for qualifying members of its career agency force. Benefits are based on years of service and career earnings. Effective July 1, 2016, the plan was amended to: (i) freeze participation in the plan; (ii) freeze benefits accrued under the plan as of June 30, 2016; and (iii) add a limited cashout feature.

The actuarial measurement date of this deferred compensation plan is December 31. The liability for the agent deferred compensation plan was $122,625,330 and $122,525,354 at December 31, 2025 and 2024, respectively (including an unrecognized (gain) loss liability of $(4,547,633) and $(6,186,584) at December 31, 2025 and 2024, respectively, reported on Page 3, Line 2504 Aggregate write-ins for liabilities). The Company has purchased a Company-owned life insurance policy ("COLI") as an investment vehicle to fund the agent deferred compensation plan. The Company is the owner and beneficiary of the policy which is invested in a series of mutual funds. The COLI assets are not assets of the agent deferred compensation plan, and as a result, are accounted for outside the plan. The cash surrender value of the policy is reported on Page 2, Line 2501 as an admitted asset under SSAP No. 21, Other Admitted Assets. The carrying value of the COLI assets was $222,328,491 and $212,642,321 at December 31, 2025 and 2024, respectively. Death benefits related to the COLI and changes in the cash surrender value (which approximates net realizable value) of the COLI assets are recorded on Page 4, Line 8.3 Aggregate write-ins for miscellaneous income and totaled $9,686,170 and $11,266,753 in 2025 and 2024, respectively. (3) The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial instruments, but it does not expect any counterparties to fail to meet their obligations given their high credit ratings. Our agreements with certain counterparties require them to post collateral. If the counterparties for the derivatives that the Company holds fail to meet their obligations, the Company may have to recognize a loss or assume ownership of the securities posted as collateral, if applicable. The Company limits its exposure to such a loss by diversifying among several counterparties generally believed to be strong and creditworthy. The credit exposure of derivatives is represented by the fair value of contracts with a positive fair value at the reporting date.

Credit risk is managed by entering into transactions with creditworthy counterparties and obtaining collateral where appropriate and customary. (3) Transfers out of Level 3 during 2025 are the result of assets being reported at net asset value (NAV) that were previously valued at fair value.

The Company's policy is to recognize transfers in and transfers out as of the beginning of the reporting period.

(4) The Company's financial assets measured and reported at fair value have been classified, for disclosure purposes, based on a hierarchy defined by authoritative guidance. The degree of judgment utilized in measuring the fair value of financial instruments is largely dependent on the level to which pricing is based on observable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our view of market assumptions in the absence of observable market information.

Financial instruments with readily available active quoted prices would be considered to have fair values based on the highest level of observable inputs, and little judgment would be utilized in measuring fair value. Financial instruments that rarely trade would often have fair value based on a lower level of observable inputs, and more judgment would be utilized in measuring fair value.

Valuation Hierarchy

There is a three-level hierarchy for valuing assets or liabilities at fair value based on whether inputs are observable or unobservable.

• Level 1 – includes assets and liabilities valued using inputs that are unadjusted quoted prices in active markets for identical assets or liabilities. Our Level 1 assets primarily include cash and cash equivalents and exchange traded securities.

• Level 2 – includes assets and liabilities valued using inputs that are quoted prices for similar assets in an active market, quoted prices for identical or similar assets in a market that is not active, observable inputs, or observable inputs that can be corroborated by market data. Level 2 assets and liabilities include those financial instruments that are valued by independent pricing services using models or other valuation methodologies. These models consider various inputs such as credit rating, maturity, corporate credit spreads, reported trades and other inputs that are observable or derived from observable information in the marketplace or are supported by transactions executed in the marketplace. Financial assets in this category primarily include: certain publicly registered and privately placed corporate fixed maturity securities; certain government or agency securities; certain mortgage and asset-backed securities; certain equity securities; and derivatives such as call options.

• Level 3 – includes assets and liabilities valued using unobservable inputs that are used in model-based valuations that contain management assumptions. Level 3 assets and liabilities include those financial instruments whose fair value is estimated based on broker/dealer quotes, pricing services or internally developed models or methodologies utilizing significant inputs not based on, or corroborated by, readily available market information. Financial assets in this category include certain corporate securities, certain structured securities, mortgage loans, and other less liquid securities.

At each reporting date, we classify assets and liabilities into the three input levels based on the lowest level of input that is significant to the measurement of fair value for each asset and liability reported at fair value. This classification is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction and overall market conditions. Our assessment of the significance of a particular input to the fair value measurement and the ultimate classification of each asset and liability requires judgment and is subject to change from period to period based on the observability of the valuation inputs.

As of December 31, 2025, the reported fair value of the Company's investment in a Level 3 issuer credit obligation bond was $2,329,718. The Company measured the fair value of this investment based on expected recovery.

As of December 31, 2025, the reported fair value of the Company's investment in Level 2 industrial and miscellaneous preferred stock was $59,779,858. The Company measured the fair value of these investments using inputs that are quoted prices for similar assets in an active market; quoted prices for identical or similar assets in a market that is not active; observable inputs; or observable inputs that can be corroborated by market data.
