NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Bankers Consecos Life Insurance Company (“Company”) are presented on the basis of accounting practices prescribed or permitted by the New York Department of Financial Services (“Department”).

The Department recognizes only statutory accounting practices prescribed or permitted by the State of New York for reporting the financial condition and results of operations of an insurance company and determining its solvency under New York Insurance Law. The *Accounting Practices and Procedures* manual (“NAIC SAP”) has been adopted as a component of prescribed and permitted practices by the State of New York.

The State of New York may adopt certain prescribed accounting practices that differ from those found in NAIC SAP. As required by New York, the Company uses continuous CARVM reserving methods for its deferred annuity contracts versus curtail CARVM reserving methods required by NAIC SAP. If curtail reserving methods were used for contracts issued beginning January 1, 2001, surplus would be increased by \$616,410 and \$596,833 as of March 31, 2025 and December 31, 2024, respectively. Additionally, net income for the three months ended March 31, 2025 and the year ended December 31, 2024 would be increased by \$19,577 and \$97,706, respectively. Using curtail CARVM reserving methods for deferred annuity contracts would not have caused the Company’s risk-based capital to trigger a regulatory event. In addition, the Department has the right to permit other specific practices that deviate from prescribed practices. However, the Company has no such permitted practices.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of New York is shown below:

B. No significant changes

C. (2) Bonds not backed by other loans are stated at amortized cost using the interest method, with the following exceptions: (i) those containing call provisions, except “make-whole” call provisions, are amortized using the yield-to-worst method; (ii) those rated NAIC class 6, which are stated at the lower of amortized cost or fair value; and (iii) perpetual bonds that do not possess or no longer possess an effective call option, which are reported at fair value regardless of NAIC designation. SVO-identified bond exchange-traded fund investments are reported at fair value with changes in fair value recorded as unrealized gains or losses. The Company does not utilize the systematic value measurement method for SVO-identified investments.

(6) Asset-backed securities are stated at amortized cost using the interest method, except for those rated NAIC class 6, which are stated at the lower of amortized cost or fair value. For securities where collection of all contractual cash flows is probable, changes in currently estimated cash flows, including the effect of prepayment assumptions, are accounted for using the retrospective method. For securities that are not of high credit quality for which collection of all contractual cash flows is not probable, significant increases in cash flow estimates are accounted for using the prospective method.

No other significant changes

D. Going Concern

The Company's management does not have substantial doubt about its ability to continue as a going concern.

NOTES TO FINANCIAL STATEMENTS

2. Accounting Changes and Corrections of Errors

In August 2023, the National Association of Insurance Commissioners (NAIC) adopted revisions to SSAP No. 26, Bonds ("SSAP No. 26"), that introduced principle-based bond concepts on what should be reported as a long-term bond. The Company adopted revisions to SSAP No. 26 on January 1, 2025. Under this new principles-based bond definition, companies are required to develop policies that ensure that instruments are only classified as bonds when they (1) meet the definition of a security, (2) represent a creditor relationship in substance and, (3) for asset backed securities, put the investor in a substantially different position than if they held the underlying assets directly. For financial asset backed securities, substantive credit enhancement must exist in addition to a creditor relationship in substance, and for cash generating non-financial asset backed securities, a meaningful level of cash flows must also exist in order to meet the definition of a bond. The assessment requires management judgment, for example, in determining whether a creditor relationship in substance exists in cases where there are underlying equities, and in determining whether substantive credit enhancement and a meaningful level of cash flows exist for asset-backed securities.

The Company performs its analysis to determine whether a security meets the definition of a bond on a case-by-case basis. To determine whether a creditor relationship exists, the Company considers several factors including, but not limited to, an evaluation of any underlying equity interests, the existence of predetermined principal and interest payments, and the variability of cash flows arising from the security. For asset backed securities, the Company additionally considers the existence and extent of subordination, the existence of collateral or guarantees, the extent of overcollateralization, and the investment's credit rating in determining whether substantive credit enhancement exists. In addition, for cash generating non-financial asset backed securities, the Company is required to evaluate whether a meaningful level of cash flows exists. The Company uses the practical expedient pursuant to SSAP No. 26 and concludes that a meaningful level of cash flows exists when less than 50% of the original principal relies on sale or refinancing. When the practical expedient is not met, the Company performs additional analysis to determine whether a meaningful level of cash flows exists, considering, among other factors, the price volatility in the principal market for the underlying collateral, the liquidity in the principal market for the underlying collateral, the diversification characteristics of the underlying collateral, the overcollateralization of the underlying collateral relative to the debt obligation, and the variability of cash flows, from sources other than sale or refinancing, expected to be generated from the underlying collateral.

The application of the principles-based bond definition requires significant judgment and therefore results of its application may change for individual securities as conditions change and new information becomes available.

Refer to Note 21 C for further details on the cumulative prospective effect of adopting the principles-based bond definition guidance.

D. Asset-backed Securities

- (1)

Prepayment assumptions for asset-backed securities are obtained from third party vendors and internal estimates. These assumptions are reviewed for consistency with the current interest rate and economic environment.
- (2)

The Company did not record any other-than-temporary impairments ("OTTI") during the three months ended March 31, 2025 under SSAP No. 43 – Asset-Backed Securities ("SSAP 43"), resulting from either an intent to sell or the inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis.
- (3)

The Company did not recognize any OTTI as of March 31, 2025 as a result of an expected shortage of discounted future cash flows to recover the amortized cost of the security on currently held asset-backed securities.
- (4)

Asset-backed securities owned at March 31, 2025 that have not been impaired with a fair value lower than amortized cost are summarized below by length of time that individual securities have been in a continuous loss position.

- (5) The Company regularly evaluates its investments with unrealized losses for possible impairment. The Company’s assessment of whether unrealized losses are “other-than-temporary” requires significant judgment. Factors considered include: (i) the extent to which fair value is less than the cost basis; (ii) the length of time that the fair value has been less than cost; (iii) whether the unrealized loss is event driven, credit-driven or a result of changes in market interest rates or risk premium; (iv) the near-term prospects for specific events, developments or circumstances likely to affect the value of the investment; (v) the investment’s rating and whether the investment is investment-grade and/or has been downgraded since its purchase; (vi) whether the issuer is current on all payments in accordance with the contractual terms of the investment and is expected to meet all of its obligations under the terms of the investment; (vii) whether or not the Company intends to retain the investment until its anticipated recovery occurs; (viii) whether it is more likely than not that circumstances will require the Company to sell the investment before recovery occurs; (ix) the underlying current and prospective asset and enterprise values of the issuer and the extent to which the recoverability of the carrying value of the Company's investment may be affected by changes in such values; (x) projections of, and unfavorable changes in, cash flows on structured securities including mortgage-backed and asset-backed securities; (xi) the Company's best estimate of the value of any collateral; and (xii) other objective and subjective factors.

On June 7, 2019, Platinum Partners Value Arbitrage Fund L.P. (in Official Liquidation) ("PPVA"), the Joint Official Liquidators of PPVA (the "JOLs") and Principal Growth Strategies, LLC, ("PGS"), commenced suit against, among others, CNO Financial Group, Inc., the Company, Washington National Insurance Company ("Washington National") and 40|86 Advisors, Inc. (collectively, the "CNO Parties") in Delaware Chancery Court. Plaintiffs seek an unspecified amount of damages, costs, attorney's fees, and other relief as the court deems appropriate. Plaintiffs allege that the CNO Parties were unjustly enriched when they terminated the Company's and Washington National's reinsurance agreements with Beechwood Re Ltd. ("BRe") and recaptured assets from reinsurance trusts, in particular, Agera securities. Plaintiffs contend that the Agera securities were fraudulently transferred to the reinsurance trusts by other Platinum-related entities and they are seeking to claw back those Agera securities, or the value of those assets, from the CNO Parties. The CNO Parties had removed the case to the United States District Court for the District of Delaware but on April 6, 2020, the District Court granted the Plaintiff's motion to remand the case back to the Delaware Chancery Court. On July 10, 2020, Plaintiffs filed an Amended Complaint and the CNO Parties moved to dismiss the Amended Complaint. The Delaware Chancery Court denied the CNO Parties' motions to dismiss the Amended Complaint on the basis of forum non conveniens, but granted the CNO Parties' motion to stay the case pending the conclusion of a related matter. On December 1, 2023, the Delaware Chancery Court lifted the stay as of November 30, 2023. On January 25, 2024, the Delaware Chancery Court granted in part and denied in part the CNO Parties' motion to dismiss the Amended Complaint. Based on the Court's ruling, PPVA and the JOLs' claims against the CNO Parties were dismissed. On April 9, 2024, PGS filed a Second Amended Complaint, which contains the same claims against the CNO Parties that PGS had previously asserted. The CNO Parties are vigorously contesting PGS's claims. The Court has indicated that it will enter a new Case Schedule setting an April 2026 trial date.

(4) The Company's financial assets measured and reported at fair value have been classified, for disclosure purposes, based on a hierarchy defined by authoritative guidance. The degree of judgment utilized in measuring the fair value of financial instruments is largely dependent on the level to which pricing is based on observable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our view of market assumptions in the absence of observable market information. Financial instruments with readily available active quoted prices would be considered to have fair values based on the highest level of observable inputs, and little judgment would be utilized in measuring fair value. Financial instruments that rarely trade would often have fair value based on a lower level of observable inputs, and more judgment would be utilized in measuring fair value.

Valuation Hierarchy

There is a three-level hierarchy for valuing assets or liabilities at fair value based on whether inputs are observable or unobservable.

Level 1 – includes assets and liabilities valued using inputs that are unadjusted quoted prices in active markets for identical assets or liabilities. Our Level 1 assets primarily include cash and cash equivalents and exchange traded securities.

Level 2 - includes assets and liabilities valued using inputs that are quoted prices for similar assets in an active market, quoted prices for identical or similar assets in a market that is not active, observable inputs, or observable inputs that can be corroborated by market data. Level 2 assets and liabilities include those financial instruments that are valued by independent pricing services using models or other valuation methodologies. These models consider various inputs such as credit rating, maturity, corporate credit spreads, reported trades and other inputs that are observable or derived from observable information in the marketplace or are supported by transactions executed in the marketplace. Financial assets in this category primarily include: certain publicly registered and privately placed corporate fixed maturity securities; certain government or agency securities; certain mortgage and asset-backed securities; certain equity securities; and derivatives such as call options.

Level 3 - includes assets and liabilities valued using unobservable inputs that are used in model-based valuations that contain management assumptions. Level 3 assets and liabilities include those financial instruments whose fair value is estimated based on broker/dealer quotes, pricing services or internally developed models or methodologies utilizing significant inputs not based on, or corroborated by, readily available market information. Financial assets in this category include certain corporate securities, certain structured securities, mortgage loans, and other less liquid securities.

At each reporting date, we classify assets and liabilities into the three input levels based on the lowest level of input that is significant to the measurement of fair value for each asset and liability reported at fair value. This classification is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction and overall market conditions. Our assessment of the significance of a particular input to the fair value measurement and the ultimate classification of each asset and liability requires judgment and is subject to change from period to period based on the observability of the valuation inputs.

As of March 31, 2025, the reported fair value of the Company's investment in Level 2 industrial and miscellaneous preferred stock was \$5,186,403. The Company measured the fair value of these investments using inputs that are quoted prices for similar assets in an active market; quoted prices for identical or similar assets in a market that is not active; observable inputs; or observable inputs that can be corroborated by market data.

Reserves as of December 31, 2024 were \$64,630,237. As of March 31, 2025, \$4,807,991 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$57,024,163 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$2,798,083 favorable prior year development from December 31, 2024 to March 31, 2025. This development was generally the result of ongoing analysis of recent loss development trends. As additional information becomes known on individual claims experience, the original estimates are adjusted accordingly. None of the Company's accident and health contracts are subject to retrospective rating or experience refunds.

The Company had no significant changes in methodologies and assumptions used in calculating the liability for unpaid losses and loss adjustment expenses.
